

ISIRI GALLAGE

Software Engineer Intern

+94 76 734 9357 | isirigallage2002@gmail.com | linkedin.com/in/isiri | github.com/in/isiri

Professional Summary

An IT undergraduate at the University of Moratuwa who enjoys building end-to-end systems, from backend architecture and database design to AI-integrated functionality like chatbots. Strong foundation in data structures and algorithms, object-oriented programming, RESTful API design, and database-driven systems. Comfortable across the full development lifecycle, including authentication, testing, and deployment. Seeking a Software Engineering Internship to apply these skills to real-world projects.

Education

B. Sc. (Hons) in Information Technology and Management (CGPA: 3.59 / 4.00) 2024 - Present

University of Moratuwa, Sri Lanka

- Dean's List – Semester 2

G.C.E Advanced Level 2022

Devi Balika Vidyalaya, Colombo 08 (2013-2022)

- Physical Science Stream – Chemistry (A), Physics (B), Combined Mathematics (C) – Z-score: 1.3551

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, C, SQL

Frontend: React, Next.js, Tailwind CSS

Backend: Flask, FastAPI, Node.js, Express.js

Databases: PostgreSQL, Supabase, MongoDB

DevOps & Tools: Docker, Git, Postman

Embedded Systems: Arduino IDE, C, Sensor Integration (FSR 402, MPU6050)

Projects

Shipment Alerting System (SAS) | Full-Stack Developer, Second Year Software Project August 2025 – August 2026

- **Tech:** Flask, Next.js, Supabase (PostgreSQL), CargoWise API
- github.com/Nadeesha-Maduwantha/SAS_project
- Built the CargoWise API integration and sync engine end-to-end, including token authentication, scheduled shipment and milestone ingestion, and automated upserts into Supabase.
- Designed the shipments database schema, including a JSONB milestones structure that allows new CargoWise milestone types to be added without schema migrations or code redeployment.
- Implemented shipment REST endpoints for listing, delayed-shipment and stats breakdowns, and department filters, with role-based access control across users.

JeevaSeva | Full-Stack Developer, Personal Project May 2026 – September 2026

- **Tech:** React, FastAPI, PostgreSQL, WebSockets, Docker
- github.com/Isiri-gallage/JeevaSeva
- Designed and built a full-stack donor-matching platform end-to-end, connecting kidney patients with living donors and coordinating emergency blood donation on the same donor base.
- Implemented JWT authentication with role-aware routing for patient, donor, and admin roles, password reset via secure single-use tokens, and real-time chat over authenticated WebSockets using short-lived, scope-separated tickets.
- Architected RESTful APIs with FastAPI and SQLAlchemy/PostgreSQL across kidney requests, blood requests, donor matching, and admin moderation, with Alembic-managed schema migrations, GitHub Actions CI (lint, tests, build), and a Dockerised stack.

Money Tracker | Full-Stack Developer, Personal Project

July 2026 – August 2026

- **Tech:** React, TypeScript, Vite, Node.js, Express, MongoDB, Tailwind CSS, Docker
- github.com/Isiri-gallage/money-tracker-mern
- Built a full-stack MERN finance tracker with JWT authentication, supporting transactions, budgets, recurring payments, and savings goals via a RESTful API.
- Integrated a Google Gemini-powered AI assistant for natural-language spending queries, and built CSV bank-statement import/export with validation and rate limiting.
- Deployed as a production PWA: Dockerised API on Railway, React frontend on Vercel, MongoDB Atlas, with CI running 79+ automated tests.

Beginner Cricket Bat Drill Trainer | First-Year Hardware Project

August 2024 – August 2025

- **Tech:** Arduino, C, HTML, CSS, React.js, FSR 402 Sensors, MPU6050
- Contributed to a microcontroller-based cricket training system giving beginners real-time, sensor-driven feedback on footwork, grip, and bat movement.
- Designed and built the Grip Work Guider module, using FSR 402 sensors to analyse front-hand and back-hand grip pressure for consistent technique tracking.

Certifications

- | | |
|---|------------|
| • Web Design for Beginners – University of Moratuwa | March 2024 |
| • Python for Beginners – University of Moratuwa | March 2024 |
| • HTML, CSS, and JavaScript for Web Developers – Johns Hopkins University (Coursera) | Jan 2025 |
| • Getting Started with MySQL Command Line – IBM | May 2025 |

Leadership & Activities

- **Inducted Member** – Rotaract Club of University of Moratuwa
- **Organizing Committee Member (Program Team)** – Road to Legacy 2.0, IEEE University of Moratuwa Student Branch
- **Publicity Committee Member (Term 25/26)** – IEEE Industry Applications Society, University of Moratuwa
- **Editorial Committee Member (Term 25/26)** – Computer Society, IEEE University of Moratuwa Student Branch

Languages

English, Sinhala (Native)
